SUMMARY

I value working on projects with clean, organized codes and good documentation. I'm currently studying more about JavaScript and React, in addition to being interested in learning about the technologies used in Back-end development. Since, in addition to being curious about the subject, I believe it is of paramount importance how an application works from the beginning to the end of development.

In addition to hard skills, I have soft skills that are useful in a work environment: efficient communication, organized work method, always looking to learn and improve my work, clean code, great teamwork and good perception of Software Design.

EDUCATION

UniAmérica – Centro Universitário União das Américas Descomplica

Predicted conclusion: 2024 (100% EAD)

Degree: Systems Analysis and Development

Rio de Janeiro/Brazil

UNESA –Universidade Estácio de Sá

Conclusion: 2020

Degree: International Relations

Rio de Janeiro/Brazil
